

## WINGS FLIGHT TRAINING *RecTrac*

The Wings *RecTrac* is designed for those who want to fly for FUN. It is a mildly accelerated, customizable, efficient course that will take a student from zero time (no flight experience at all) to an instrument rating (which allows the pilot to fly in the clouds). This program (from zero to instrument instructor) can be completed in as few as 12 months.

Here is an outline of the timeline and the costs for each certificate:

<b>Private Pilot<sup>1</sup></b>		<b>Instrument</b>		<b>Hour Building</b>		<b>TOTAL</b>
14,768.55		10,681.50		6,600.00		<b>\$32,050.05</b>
3 mo.		3mo.		3 mo.		<b>9 mo.</b>

<sup>1</sup> Private Pilot costs will vary more than other ratings will because each student learns at a different pace. {See *Scenarios*} Prices subject to change. Other Fees may apply under certain Financing Programs.
